

Portable Energy from Design to Delivery

Since 1965

House of Batteries specializes in the development of custom power systems for medical, industrial, portable product, military, and aerospace applications. From off-the-shelf batteries to custom designed and assembled battery packs, House of Batteries has the technical capabilities to solve your most difficult power requirements.

### House Of Batteries

For over 40 years, we have provided battery solutions for an ever changing market. In every battery chemistry, for every application, our customers have relied on the proven dependability of House of Batteries' products.

We have always made it our goal to stay in touch with the growing needs of our customers and the markets we serve.

### Commitment to Quality

We are committed to offering our customers the latest, most reliable cell technologies available. We follow strict guidelines in interpreting our customer's requirements to ensure adherence to all specifications and to enhance the performance of the customer's end product.

### Engineering and Design

We specialize in providing custom battery solutions for unique power requirements. Our engineering team can assist customers with even the most complex designs. Our solutions are tailored to meet both our customer's expectations and industry requirements for safety and performance. Our in-house circuit design group can address the most demanding requirements for pack protection, fuel gauging, and charging circuits.

### Production Excellence

At our ISO 9001 certified, 36,000-square-foot facility in Fountain Valley, CA, we produce custom battery packs in our ESD and temperature controlled assembly area. Our quality assurance department performs rigorous testing and inspections on everything we produce. With incoming material inspection, in-process testing, and final inspection, we track and record every process from design to delivery to ensure that each product we ship will exceed our customers expectations.

*House of Batteries has the expertise, procedures, and the project management tools to help you bring your products to market as soon as possible.*

### Medical Equipment

In the medical field, reliability is critical. We use only the highest quality components and have implemented the quality systems and procedures necessary to meet the high level of dependability required by medical OEMs.

With applications including imaging systems, drug delivery, ventilators, surgical tools, ultrasound devices and patient monitors, medical professionals can trust that our batteries will provide the performance needed during critical procedures.

### Test and Measurement

Rugged handheld devices that are used to support Automatic Identification and Data Collection (ADIC) and other handheld computing applications are subjected to demanding daily usage. Equally demanding for batteries are the imaging devices, data loggers, transmitters, and field measurement devices which often need to operate in extreme environments.

We meet the challenges of these applications with advanced, lightweight, and rugged portable power solutions.

### Military and Aerospace

In today's military environment the modern soldier benefits from lightweight and rugged portable power sources contained within sophisticated battlefield equipment. Under these circumstances, reliability is a must. House of Batteries has worked with military and aerospace manufacturers to develop specialized battery systems for unmanned aerial vehicles (UAV's), enhanced communications, military UPS systems, ruggedized computers, fire suppression systems, night vision, and head mounted displays.

New, smaller and longer running portable power products are in constant demand to supply the needs of applications such as hazard detection, asset tracking, inspection, identification, and surveillance technologies.

Our production facility constantly supplies batteries and battery assemblies that conform to the strict quality standards required by a wide range of demanding applications.

- Medical Devices and Instrumentation
- Portable Test Equipment
- Telecommunications
- GPS and Asset Tracking
- Security and Surveillance
- Avionics and Aerospace
- Consumer Electronics
- Computer and Memory Back-Up
- Data Acquisition and Logging
- Military and Emergency First Responders
- Oceanography Equipment
- Professional Video and More

**ISO 9001 Certified**

**Certified Woman Owned**

**ITAR Registered**

**Member of RBRC**

*House of Batteries offers optimal performance in custom battery assemblies. We specialize in providing the right battery for your unique power requirements by utilizing the latest in cell technologies.*

Since 1965, **House of Batteries** has been providing manufacturers with innovative designs, quality products, and custom battery assemblies.

We are an authorized value-added center for all of the world's leading battery manufacturers.

**House of Batteries'** team of design engineers can help you select from virtually any chemistry, size, and technology to fit your specific application.

Our goals are to put advanced battery technology to work for our customers, be responsive to their needs, and to offer quality solutions that will not only deliver cost benefits, but also enhance product performance.

**House of Batteries** is your source for the latest battery technologies and solutions.
